MONTREAL

We understand history by looking back on the past from the present. This return trip between our own era and earlier times gives us the distance needed to assess the progress of a society.

The Museum's mission is to be the mirror of a city that is open to the world, a museum that stirs reflection and has a current take on today's issues.

Each educational activity is designed to show objects in the collection in relation to the concepts of time, space and society.

Instructive, compelling and entertaining, our exhibitions spark the imagination and put students at the centre of the action.
